

Spike neutralize, dissolve & bind package

Created by Paul Thomas MD - Retired on Aug 21, 2023

Updated on Apr 4, 2024

COVID vaccinated individuals (and sometimes those who had natural infections) may develop, inflammation, clotting and scarring, immune and autoimmune challenges and hundreds of new and old symptoms from fatigue, to neurological, cardiac and clotting or bleeding and scarring in almost any tissue. Spike protein appears to be the toxin triggering most of these issues. This group of supplements may assist your body in neutralizing, dissolving and binding the Spike protein. This is a must for your home emergency kit and you should consider implementing these at the first signs of health challenges.
